Roneo '750'

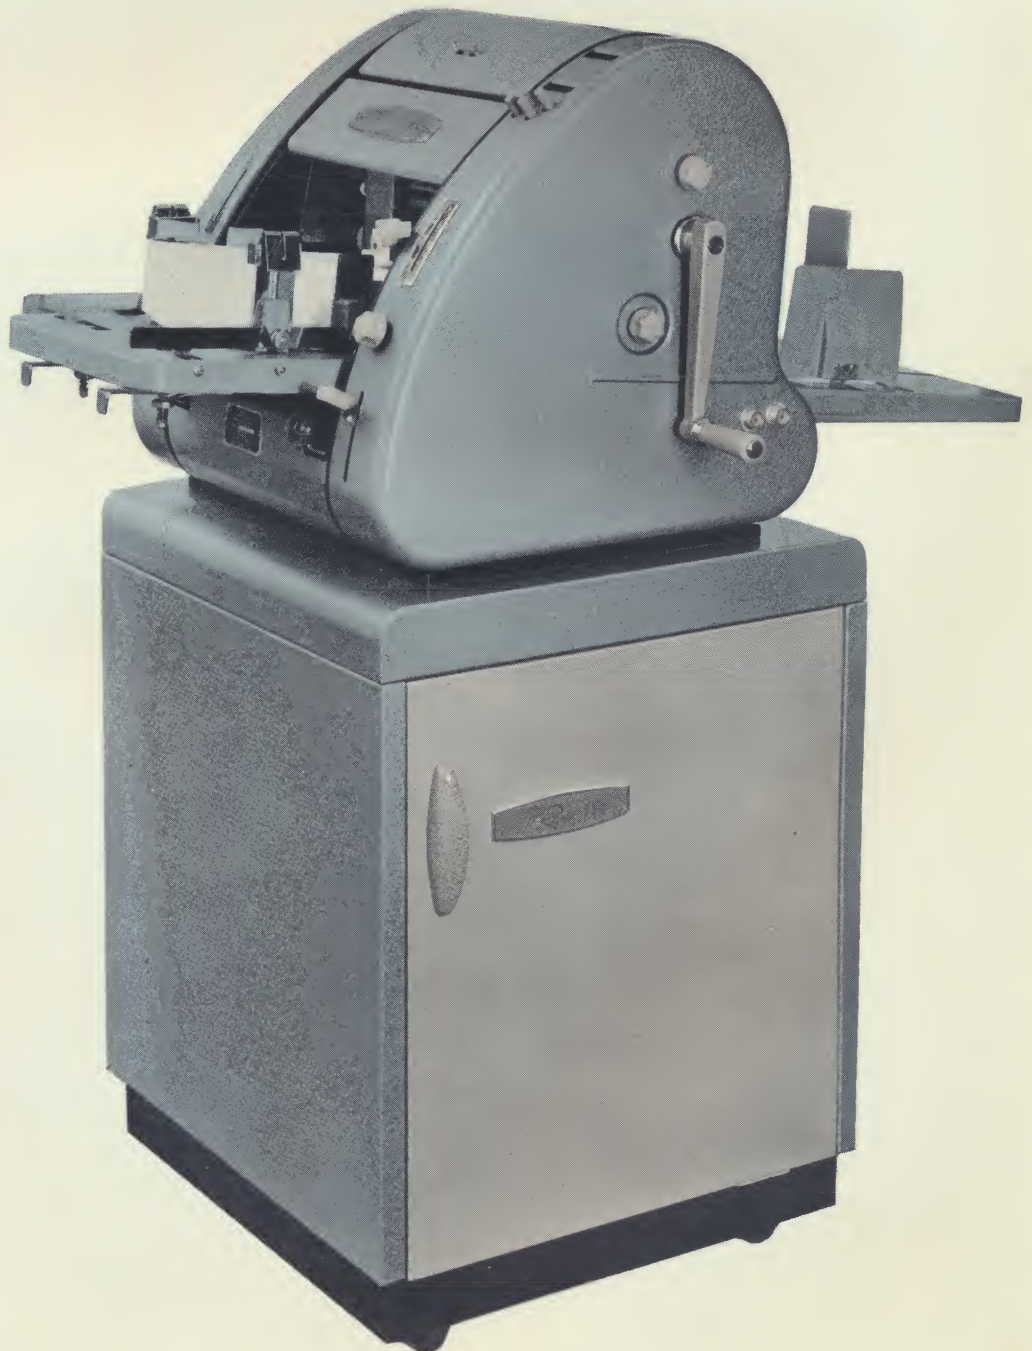

*sets a new world pace in
PRECISION AUTOMATIC DUPLICATING*

There's never any fuss . . . noise . . . or bother with the Roneo Rapid '750'. Here's a duplicator especially designed to work in a whisper with a minimum of preparation and attention . . . offering you the ultimate in high-speed automatic performance.

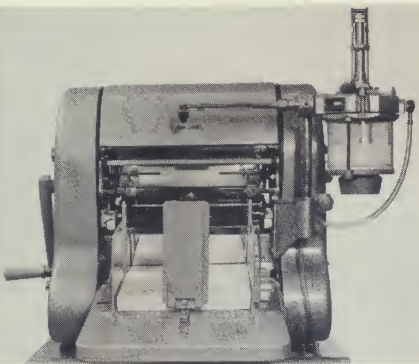

Because the '750' is one of the most silent working duplicators in the world it never causes unnecessary disturbances to others working in the same office.

Comparative tests against other leading duplicators prove that Roneo is the ONE machine that equals or improves upon the outstanding merits of ALL the leading duplicators. This is especially true in the area of paper stacking, an important consideration for getting precision registration in multi-color duplicating.

Because the Roneo Rapid '750' reduces the day-to-day costs of materials and labor, it repays its entire installation cost in just a few months. From then on . . . you continue to benefit by enjoying considerable savings on each and every job.

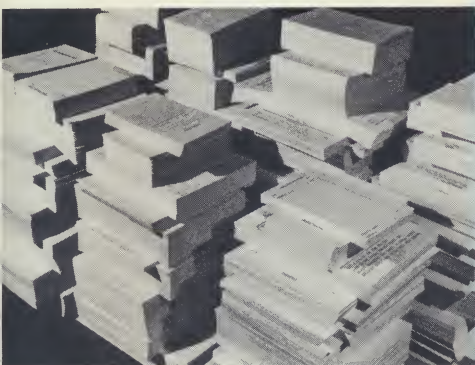

Compare these features:

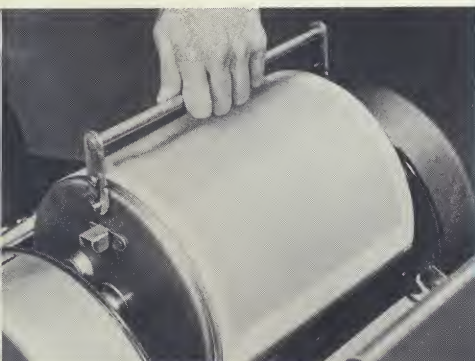

SMOOTH PAPER TECHNIQUE

Thanks to Electro-Spray, an optional extra, even hard-surfaced papers can be used without set-off.

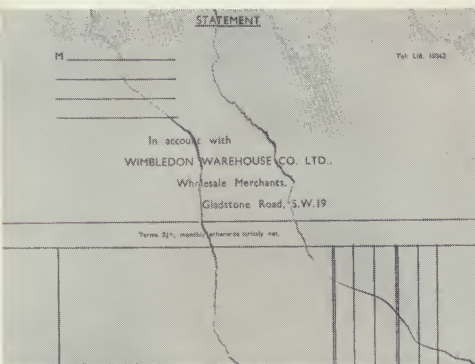

ECONOMY OF OPERATION

The above photo shows 27,800 copies produced on the Roneo Rapid '750'. You now get 2-4 times the number of copies from a single pound tube of ink.

QUICK...CLEAN COLOR CHANGE

Takes only 25 seconds for the operator to change color. There are no rollers to wash down... nothing to wipe clean... never any mess or wasted time. The operator stays clean too.

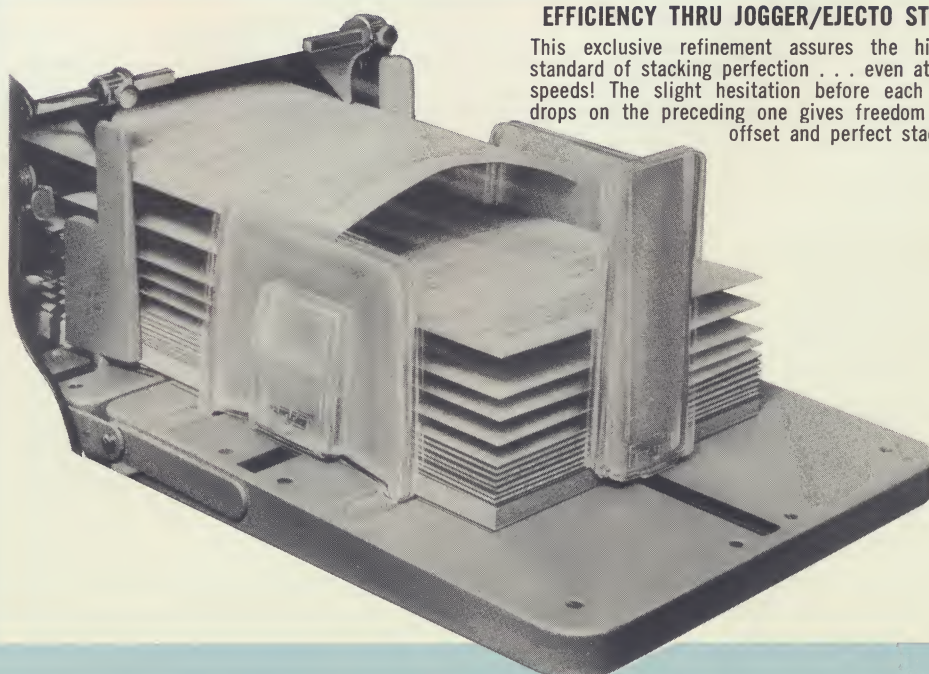

PRECISION REGISTRATION

This photo shows three ruled forms taken at random from different stages of a run. Two forms have been partly torn away to show the perfect alignment of each copy.

- The Roneo Rapid '750' offers you so very much more than other duplicators. It lets you print edge-to-edge on the increased paper sizes which are now becoming standard. You can print an ink area $8\frac{1}{2}'' \times 13\frac{3}{4}''$ on a $10'' \times 15''$ sheet producing impressions at variable speeds up to 180 copies per minute. The Roneo Rapid '750' holds nearly two reams of normal paper in the feed and its economical automatic inking system gives you two to four times the usual number of copies from each pound of ink compared to other machines.
- Our 25 second color-change lets you take advantage of the "ATTENTION GETTING" value of a second color without washing down or cleaning rollers. A single lever control operates the feed, idle, stop, tray lower, etc., for the greatest simplicity of operation. Two other NEW Roneo features are the Jogger/Ejecto strip combination for absolute perfection in high-speed paper stacking and Electro-Spray which saves you the expense of using blotters or interleaving sheets when imprinting on hard-surfaced paper.
- So ask for a comparative demonstration in your own office against any machine you like . . . and decide for yourself. We think you'll find it pays to own a Roneo.

EFFICIENCY THRU JOGGER/EJECTO STRIP

This exclusive refinement assures the highest standard of stacking perfection . . . even at high speeds! The slight hesitation before each copy drops on the preceding one gives freedom from offset and perfect stacking.

The 12 'MUSTS' that make Roneo '750'

the world's outstanding new duplicator

How '750' measures up to the essential requirements of modern duplicating in comparison with the foremost duplicators in the world.

	RONEO '750'	DUPLICATOR A	DUPLICATOR B	DUPLICATOR C
1. It must have <i>fully</i> automatic inking.	✓ No inking adjustment necessary. <i>Fully</i> automatic to all parts of the stencil.	—	—	—
2. It must be simple to use.	✓ Could not be simpler. Operator can leave machine to run itself.	✓	—	—
3. It must cut running costs.	✓ Cuts cost of ink, paper, stencils and staff time lower than ever before.	—	—	—
4. It must give usable first copies.	✓ First copies are usable. No proofing necessary.	✓	—	—
5. It must eliminate slipsheeting even with SMOOTH-SURFACE papers.	✓ Thanks to 'Electro-Spray' even hard-surface papers can be used without set-off.	—	—	—
6. It must give precision registration.	✓ Registration is of exceptionally high standard.	✓	✓	—
7. It must be able to feed from lightweight paper to cardstock.	✓ Perfect feeding from lightweight paper to cardstock including single postcards the right way on.	✓	—	✓
8. It must have variable speed drive with a high top speed.	✓ New vario-speed gives complete flexibility from slow to top speed.	✓	✓	—
9. It must have a quick clean color-change.	✓ Absolutely <i>clean</i> color-change in 25 seconds.	—	—	—
10. It must print any predetermined number of copies automatically.	✓ Automatically stops when the predetermined number of copies are printed.	—	✓	✓
11. It must stack finished copies neatly.	✓ Ejecto-strip neatly stacks finished copies.	✓	—	✓
12. It must be possible to make adjustments to straighten typing that is out of true.	✓ Linomatic copy leveller automatically adjusts the printing from a stencil typed out of true.	✓	✓	—

The Roneo '750' automatically produces the highest possible standard of work . . . at a running cost so reasonable that it will amaze you.

Do ask for a demonstration in your own office . . . and form your own conclusions.
